SUMMARY

IT professional with over 3 years of experience in network engineering and operations. Experienced in network infrastructure deployment, NOC operations, and team leadership. Skilled in routing, switching, monitoring, and performance optimization across enterprise environments. Strong analytical mindset with a commitment to delivering reliable, scalable, and secure network solutions.

EXPERIENCE

PT INDONESIA TRANS NETWORK

(July 2023 - Present)

Helpdesk NOC Lead

- Lead and manage the NOC Helpdesk team in handling customer network-related incidents and service requests.
- Supervise daily operations, ensuring timely response and resolution in accordance with SLA standards.
- Provide technical guidance, mentoring, and direction to team members to improve performance and service quality.
- Coordinate with Network Engineers and other technical divisions to ensure effective problem resolution.
- Monitor team performance, allocate resources efficiently, and optimize workflow processes.

Network Operations Center

- Maintain connectivity between Internet Exchange Points (IXPs) and server-to-client connections.
- Conduct network monitoring and collaborate with cross-functional teams to ensure system stability and high availability.
- Handle incident management, escalation procedures, and coordinate with upstream providers when necessary.
- Maintain accurate network documentation and generate operational reports.
- Monitor and maintain backbone and client network infrastructure to ensure high availability and performance.

MAL KARTINI - LAMPUNG

(June 2022 - July 2023)

Network Engineer

- Redesigned and rebuilt the entire network infrastructure from the ground up to improve reliability, scalability, and performance.
- Performed end-to-end network installation and configuration for office areas and multiple tenant spaces.
- Installed, configured, and maintained CCTV systems throughout the mall building to ensure security and continuous surveillance.
- Implemented structured cabling, rack organization, and network device deployment.
- Monitored network performance and security systems to ensure stable operations across all areas.
- Conducted troubleshooting and preventive maintenance to minimize downtime and service disruptions.

SMK AL IMAN 2 - LAMPUNG

(July 2018 - August 2018)

Network Engineer

- *Designed and implemented LAN and wireless network infrastructure to support academic and administrative operations.*
- *Installed and configured network devices, including routers, switches, and access points.*
- *Managed network performance, bandwidth allocation, and user access to ensure stable and secure connectivity.*
- *Provided technical support for teachers and staff related to network and connectivity issues.*

EDUCATION

UNIVERSITAS TEKNOKRAT INDONESIA (2018 - 2022)

GPA 3.56

Bachelor of Informatics

SKILLS

- **Networking**

BGP, OSPF, MPLS, VLAN, VXLAN, EVPN and Layer 2/Layer 3 Technologies

- **Infrastructure & Systems**

Network Monitoring, Bandwidth Management, Structured Cabling, CCTV Systems, LAN/WAN

- **Virtualization & Platform**

Proxmox, Docker, Linux-based Systems

- **Core Competencies**

Incident Management, Root Cause Analysis, SLA Management, Network Documentation, Team Leadership
